

# Standby AC Power Products & Services

- Peace of mind that GE is your single source for a complete design/build turn-key project
- Proven expertise and reliability of GE Energy Services and Products
- Competitive pricing on services and products

## GE Energy Standby AC Power Products & Services

GE Energy understands that the power for your network is crucial to your success. Our proven track record and deep experience in planning, designing and deploying full turn-key standby power solutions will keep your network running when commercial power is down. Serving as your single point of contact, we will ensure that optimal results are delivered on time and within budget. We offer a comprehensive range of services and products for single and multiple engine-generator installations including planning, engineering design services, procurement, installation, testing and commissioning.

### Overview

Our TL9000 certified field technicians and support engineers have become trusted advisors to our customers and always available to answer questions and help with any situation.

In addition to our own energy systems expertise, our teams of Tier 1 Service professionals are very familiar with all major AC/DC power manufacturers' products.

Our goal is simply to provide our customers with best in class quality and on time delivery of our service solutions.

Our philosophy is to help you do your job better, spend less time doing it, and become your favorite vendor by delivering on our promises. We measure our success based on your satisfaction. We live by the philosophy:

**"There is nothing more important than our customers."**

### Features

- Site Survey, Analysis and Planning Services
- Proposal and Pricing
- Complete Engineering and Design Services
- Equipment Specification and Procurement
- Complete Installation and Construction Services
- Project Management Services
- Testing, Start-Up and Commissioning
- Complete Project Documentation including Office Records and Single Line Diagram Preparation

### Products

- Complete line of Switchgear, Automatic Transfer Switches and electrical distribution products.
- Paralleling switchgear and generator controls customized for your application
- Procurement of generator sets from all major manufactures

imagination at work

### Who We Are:

- Bell Labs heritage of innovation in power electronics
- Global provider of hardware, software, and services that deliver high-efficiency power conversion solutions to OEM customers, telecom service providers, and large enterprises
- 2300+ employees with in-depth technical expertise in 25+ locations worldwide
- 200+ North America Services experts with experience spanning 30+ years

### What We Do:

- Energy Systems solutions for telecommunications, wireless, and cable broadband service providers leveraging turnkey project management, engineering, installation, and maintenance services experience
- AC-DC OEM embedded power supplies for datacom, telecom, medical, and industrial applications leveraging personalized service and support
- DC-DC OEM embedded power conversion solutions designed for the most demanding board mounted power applications in communications, computing, storage, industrial, and medical markets leveraging patented Tunable Loop™ technology
- Global manufacturing base provides world-class quality and delivery at competitive prices

### Why We Are Different:

- Services for complex site engineering and deployment programs; to full operations and lifecycle management
- Industry's best customer experience built on a foundation of world-class operations
- End-to-end Total Efficiency™ architecture that dramatically reduces utility and cooling costs
- Technology designed for decades of reliable use in extreme environmental conditions
- Standards-based, open-architecture solutions to address diverse needs, accelerate ROI, and lower TCO
- Our thought leadership and attention to detail ensures
- Proven quality and peace of mind
- Longevity of deployed power plant
- System recoverability and future growth flexibility
- Safety and reliability with "Do it once, do it right, do it now, on-time, within budget" culture
