

Refiner Services

For more than 20 years, GE Energy has offered a full range of high-quality refiner services. Our service centers specialize in providing services for high-intensity refining operations, from the largest to the smallest applications, including newsprint, fine-paper, directory papers, and medium-density fiber-board (MDF). GE Energy engineers and technicians have extensive experience servicing installed refiner systems across the U.S. and Canada.

Comprehensive Services

GE's refiner services range from refurbishment of rotating assemblies to complete machine rebuilds with the latest technology components. With customer-oriented flexibility, we also provide a variety of on-site solutions that save time and reduce costs, and offer you additional alternatives to OEM services. Our refiner services include:

- Scheduled Major Overhauls
- Emergency Repairs
- Component Rebuilds
- Component Upgrades and Modifications
- On-site Services
- Spares Management

We service all types of refiner equipment, including

- Blow-Line
- Twin
- Double-Revolving Disc
- Single-Disc
- Pump-Thru
- Specialty

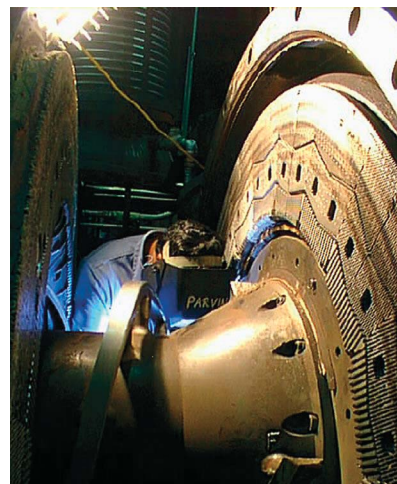

We also service refiners from most major manufacturers.

The GE Advantage

Refiner services from GE Energy offer several important advantages over service typically received from OEMs or other providers.

- **Advanced Technological Innovation.** We provide innovative upgrades and modifications to adapt your refiners to new process applications.
- **Improved Performance and Extended Life.** Through material upgrades, redesigned components, and capacity and horsepower modifications, GE Energy can greatly enhance the performance and reliability of your refiner. The need to purchase and install new equipment is often eliminated.
- **Complete Range of Services.** We offer more comprehensive services than most other service providers, including OEMs.
- **Shorter Cycle Times.** In most cases, GE can complete comparable services for your refiner in less time than the OEM or another service provider.
- **Competitive Pricing.** You can often reduce your maintenance costs with refiner services from GE versus other service providers.
