

EASIER IS BETTER, BETTER IS EASIER

The beauty of simplicity

C-2000™ 22mm global push buttons

All components are interchangeable and snap together. That simplifies assembly, reduces inventory requirements and increases flexibility.

Functional contours complement clean, distinctive European lines. That translates into good ergonomics as well as good looks.

Operators come in four styles and a huge array of types. That makes it easy to get exactly what you want.

Unique double-bridge wiping contacts are encased in ultrasonically welded housings. That produces long life and contact fidelity.

Advanced design and manufacturing technologies include 100% on-line inspection. That assures you of the reliability you need.

Conformance to all major world standards is matched by world-wide nomenclature and world-wide availability. That makes this a truly global line.

All this is what you get with new C-2000™ push buttons. And *that's* the real beauty of simplicity. Take a closer look. See your GE ED&C distributor.
