

GE Consumer & Industrial -
Electrical Distribution

Current Rating
30 Amperes

Voltage Rating
1-pole and 2-pole - 120/240 Vac

Frequency Rating
50/60 Hertz

Molded Case Circuit Breakers Q Line

Type THQB/THHQB - Model C
Long-time Delay and Instantaneous
Time-current Curves

Curves show circuit breaker in open air, 40°C ambient, wired with conductors of corresponding rating, no prior load. For all other ambients, use rating shift index at top of sheet.

DES-062 Supersedes GES-9888

Adjustments

Long-time delay thermal trip: not adjustable.
Instantaneous magnetic trip: not adjustable.
