Transformer Taps (Amperes)

AK-15 & -25	45, 70, 90, 125, 175, 225
AK-25 & -50	200, 300, 400, 500, 600
AK-50	600, 800, 1200, 1600
AK-75	1500, 2000, 2500, 3000
AK-100	2000, 2500, 3000, 4000

**Type AK Low-Voltage
Power Circuit Breaker
Power Sensor™ Solid-State
Overcurrent-Trip Device**

Long-time Delay and Instantaneous
Time-current Curves

Curves apply at 60 Hertz
and from -20°C to +55°C ambient

GES-6020

Adjustments

Long-time-delay Unit: Pickup current settings are 80, 90, 100, 110, 120 & 130% of transformer tap settings. (Settings higher than 100% of the frame size rating do not increase the continuous current rating.) Time-delay bands are Max., Int., & Min.
Instantaneous Unit: Pickup current settings are 4X, 5X, 6X, 8X, 10X, and 12X of transformer tap setting.
